

Standard electronic voltage detector - optical & acoustic

Medium voltage

Voltage presence is indicated by LED lighting and high acoustic signal.
Self-checking device incorporated.
Power supply 9V alkaline battery, type 6LR61.
Indoor and outdoor use by insulating pole according rated voltage of the detector.
End fitting to the pole by Universal type.

Mod. VTE-5/ 36-P

Detector with pole

- Rated voltage: 5 to 36 kV
- Frequency: 50 Hz (Request for other frequencies)
- Insulating pole 1,25 m (included)
- Supplied with carrying bag for pole and rigid plastic box to store and transport the voltage detector

Code

641103

Mod. VTE-5/ 66-P

Detector with pole

- Rated voltage: 5 to 66 kV
- Frequency: 50 Hz (Request for other frequencies)
- Insulating pole 2 m (included)
- Supplied with carrying bag for pole and rigid plastic box to store and transport the voltage detector

Code

641105
